Chicago 54, Ill. August 1947

A PARTIAL BIBLIOGRAPHY RELATING TO AGAR

By Leonard S. Stoloff,
Former Chemist, Division of Commercial Fisheries

The following bibliography on the subjects relating to agar was completed during a wartime assignment to search for new sources of agar-like gums from domestic seaweeds. It is not complete, but covers the literature available in the Washington, D. C., area at the time.

Alleger, W. W.
1899. Preparation of agar.
J. Roy. Microscop. Soc. 543-544.

Anon.
1907. The food value of vegetable "gelatins".
J. Am. Med. Assoc. 48: 142-143.

Anon.
1921. The Japanese agar industry.
Farben. Ztg. 26: 1849.

Anon.
1927. Methods of manufacturing agar in Japan.
U. S. Commerce Reports Oct. 10. Chemist and Druggist 108: 668 (1928).

Anon.
1930. Publications on seaweeds.
U. S. Bureau of Fisheries, Fishery Industries, Special Memorandum 2315.

Anon.
1940. Migration of iron and manganese in colloidal systems.
Ill. Agr. Expt. Sta. Bull. 472: 103-143.

Anon.
1941. Seaweed to the rescue.
Fisheries News-Letter, Division of Fisheries, Australia,
Council of Sci. and Ind. Research, 1: 11.

Anon.
1942. Substitute for agar.
Foreign Commerce Weekly Oct. 17, p. 22.
U. S. Department of Commerce.

Note: Many of the publications listed may be consulted in, or borrowed through, university and public libraries; others can be obtained by communicating with the publishers or the issuing institution.

Araki, C.
1937. Agar I. Chemical changes in the process of preparation of agar. J. Chem. Soc. Japan 58: 1085-1088.

Atsuki, K.
1922. Agar. Japanese 42,126, March 29 (patent)

Ayers, S. H., Mudge, C. S. and Rupp, P.
1920. The use of washed agar in culture media. J. Bact. 5: 589-596.

Baier, W. E. and Manchester, T. C.
1943. Research finds substitute for bacteriological agar. Food Industries 15: no. 7, 94-96.

Banerji, S. N. and Ghosh S.
1939. Changes in the viscosity of agar solutions with concentration. Proc. Natl. Acad. Sci., India 9: 144-147.

Banerji, S. N. and Ghosh, S.
1939. Changes in the viscosity of agar sols with temperature. Proc. Natl. Acad. Sci., India 9: 148-153.

Barry, V. C., Dillon, T. and McGettrick, W.
1942. Periodic acid as a test for the constitution of polysaccharides. J. Chem. Soc. 183-185.

Bauer, R. W.
1885. Ueber den aus Agar-agar entstehenden Zucher, uber eine neue Saure aus der Arabionose nebst dem Versuch einer Classification der gallertdildenden Kohlehydrate nach den aus ihnen entstehenden Zucherarten. J. Prakt. Chem. 30: 367-388.

Bauder, C. S.
1920. Agar-agar to be manufactured in Southern California. California Fish and Game, 6: no. 1, 31-32.

Bechold H. and Ziegler, J.
1906. Die Beeinflussbarkeit der Diffusion in Gallerten. Z. Physik. Chem. 56: 106-121.

Becker, J.
1929. Means and method of dehydrating flaked agar or the like. U. S. 1,703,654. February 26 (patent)
Agar product and method of producing the same. U.S. 1,712,785. May 14. (patent)

Becker, J.
1929. Dewaterer for flaked agar or the like. U. S. 1,726,942. September 3.

Bisserie.
1907. Procede simple et rapides de preparation des milieux geloses et gelatines. Ann. Inst. Pasteur 21: 235-236.

Bleisch, M.
1895. Ein Apparat zur Gewinnung klaren Agars ohne Filtration.
Centr. Bakt. 17, Abt. 1, 360.

Blundell, G. P.
1943. Simple procedure for recovery of agar.
Science 97: 76.

Bradford, S. C.
1923. On the theory of gels.
Biochem. J. 17: 230-239.

Braun, A. (to Westinghouse Lamp Co.)
1922. Wire drawing lubricant.
U. S. 1,409,358. March 14. (Patent)

Brodie, J. and Stiven, D.
1942. Reclamation of used agar.
J. Hyg. 42: 498-499.

Brown, O. H. and Sweek, W. O.
1917. Liquid agar-agar in constipation.
J. Am. Med. Assoc. 69: 467.

Browne, C. A.
1922. Moisture absorptive power of different sugars and carbohydrates under varying conditions of atmospheric humidity.
Ind. Eng. Chem. 14: 712-714.

Buchner, E. H. and Kleijn, D.
1927. The flocculation of agar sols through salt mixtures.
Proc. Sect. of Sci., Roy. Acad. Sci., Amsterdam 30: 740-742.

Bugenberg de Jong, H. G.
1928. Die Viscositatsanderungen bei Beginn der Gelatinierung von verdunnten Agar Solen.
Rec. Trav. Chim. 47: 797-818.

Bugenberg de Jong, H. G.
1929. Zur Kenntnis der lyophilen Kolloide. Kapillarelektrische Ladung und Hydratation als Zustandvariable der hydrophilen Gele: Reversible Volumanderungen des Agargels.
Kolloidch. Beheifte 29: 454-483.

Cameron, F. K., Moore R. B. et al.
1912. Fertilizer resources of the United States.
Senate Document 190 P. 257. read Dec. 18, 1911 to 62nd Congress, 2nd session. Transmitted from Sec'y. of Agriculture.

Carey, C. L.
